Education

Bachelor in Mathematics and Computing — Madrid, ES
Universidad Carlos III de Madrid — *Sep. 2026 – Present*
Admitted with a 12.37/14 to a program with top 6.9% entrance cutoff in Spain
Relevant Coursework: Calculus I, Fundamentals of Mathematics (Proofs and Set Theory), Linear Algebra I

Associate Degree in Software Development (Spanish Higher National Diploma) — Santander, ES
Ceinmark — *Sep. 2024 – May 2026*
GPA: 9.47/10
Relevant Coursework: Programming, Services & Processes Development (Java); Data Analysis and Machine Learning (Python, scikit-learn); Databases (SQL)

Experience

Software Development Intern — Santander, ES
Setelsa Security — *Mar. 2026 – Jun. 2026*

- Developed a mobile application for iOS and Android targeting a corporate API service for employee time management, reducing development time by 50% by using a common codebase in .NET MAUI for various target platforms
- Maintained internal company tools in C++ and web technologies

Projects & Extracurriculars

Software Developer · Video Game Community (FiveM) · *Lua, JavaScript, SQL* — Jan. 2022 – Dec. 2022

- Contributed as a developer to an online video game community on FiveM, a GTA V modification platform, maintaining and expanding a Lua codebase with over 500 daily users
- Managed multiple production databases in MySQL
- Collaborated with team members, using GitHub Actions to automate deployment workflows across test and production environments
- Developed new scripts and functionalities in Lua

LineLock · Personal Project · *Java, Git* — 2026

- Secure command-line password manager in Java with AES-256-GCM encryption, PBKDF2 key derivation, and a JSON-backed encrypted store
- CI/CD pipeline for automatic tool deployment and update

MathGraph · Personal Project · *JavaScript, HTML/CSS, Git* — 2026

- Interactive knowledge graph of the Spanish PAU/EBAU mathematics curriculum (146 concept nodes, prerequisite-based progression) built with vanilla JavaScript, D3.js, and MathJax. Developed to help with math exam preparation

Face Recognition System · Personal Project · *Docker, Python, AI/ML* — 2026

- Developed a distributed system using Docker containers, connecting cameras to a central service for image selection and face recognition, using small open-source vision ML models and sending a Telegram notification when a familiar face is detected

Technical Skills

Languages: Java, Python, C#, SQL, HTML/CSS

Frameworks: .NET, .NET MAUI, Spring Boot

Developer Tools: Git, Docker, AWS, Linux tooling, GitHub & GitHub Actions, CI/CD

Libraries: pandas, NumPy, Matplotlib, scikit-learn

Awards, Interests & Other Skills

Spoken Languages: Spanish (Native), English (C1 Cambridge Advanced Certificate)

Interests: History, Sports Climbing, Poker

Awards: 2nd place, Data4Mobility 2025 (Santander City Hall): pitched a unified mobility app with crowdsourced escalator status reports
